

# St. James Catholic School 2010 Addition & Renovation Project

Passa Architects was awarded the contract for this 5,100 square foot addition to the St. James Catholic Elementary School in Windsor, Ontario by the WECDSD in early 2010. An extremely tight timeline for this project meant that the design and contract documents had to be completed and issued within an approximately 2 month period of receiving approval to proceed by the school board. The project was completed in time for the new school year in September 2010. The new addition comprises of four new classrooms, a storage room and both boys and girls washrooms. The addition was designed to provide ample daylight in classrooms with large windows but minimize interior heat gain and glare by providing deep roof overhangs at the windows. Passa Architects was able to meet tight time line scheduling restraints and have the project remain under budget while meeting all of the WECDSD programming requirements for the project.
