

Lakeview Montessori School Addition

Tecumseh, Ontario, Canada - Completed in 1998

The 6,500 sq. ft., five classroom two-storey addition designed by Passa Associates Architects for the Lakeview Montessori school in Tecumseh, Ontario met the space demands for the rapidly growing enrollment of the school. Previous housed in an adjacent convenience store the new addition provided a new and very distinctive image for the school with large bay windows protruding through the roof allowing significant daylight into the classrooms while providing a connection to the outdoor environment. An in-floor efficient heating system was installed on the lower level which was connected to the domestic hot water supply for further comfort for children's play on the floor.
